

ELIGIBILITY CRITERIA

Papers must be submitted on the understanding that they have not been published elsewhere (except in the form of an abstract or as part of a published lecture, review, or thesis) and are not currently under consideration for publication elsewhere. The submitting author is responsible for ensuring that the article's publication has been approved by all the other coauthors. In accordance with usual practice, papers previously published and are under consideration for publication elsewhere cannot be accepted.

AUTHOR'S GUIDELINES

The journal publishes original papers in English. Manuscript will be reviewed by a minimum of two referees and will be considered for publication on the basis of originality of contribution.

Preferred formats for the text and tables of your manuscript are .doc, .rtf. prepared using Microsoft Word or other wordprocessors software.

A paper for publication in Journal must contain a title, names and affiliations of the authors, a list of keywords, a brief abstract at the beginning, a conclusion section at the end of the main body, and a list of references that follows the conclusion section. The manuscript must be type written with single spacing and wide margins, on a single side of an A4 paper. The text should be in single-column format. Times New Roman typeface should be used throughout. Each page should be numbered beginning with the title page to facilitate review.

Title and Authors' Names and Affiliations

The title of the paper should be typed in boldface and centered on the page. The authors' names should also be centered on the page. Directly under the authors' names, place their affiliation(s), with full postal address and email address for each author, centered on the page. We also ask to add ORCID iDs, unique codes that identify the individual(s) who contributed to research.

The Abstract

Each manuscript must be accompanied by an abstract that should count 200...250 words and have a structured form which reflects your paper (background, material and methods, results, conclusion). The abstract should not include references, figure citations or acronyms.

The Key Words

The authors are requested to supply 6...10 Key Words, separated by a semi-colon, that can be used for indexing/abstracting purposes. Key Words should not repeat the title of the manuscript.

Headings

It is useful and recommended to divide the full text in paragraphs (or sections), with titles assigned with serial Arabic numbers and typed in capital all significant first letters, centered, as in Sample Manuscript. The first paragraph is usually, but not obligatory, denoted as 1. Introduction, but the last becomes as a rule entitled

Conclusion. The last paragraph (section) reflects the findings of the author, in the form of a set of concise sentences numbered sequentially by Arabic numbers.

Nomenclature and units

Follow internationally accepted rules and conventions: use the international system of units (SI). If other quantities are mentioned, give their equivalent in SI or if SI units do not exist, in an internationally accepted unit.

Equations and Mathematical Expressions

Equations are separated from the paragraphs of text. They should be centered in the text. These equations should be numbered consecutively using Arabic numbers enclosed in parentheses and set on the right margin. The respective references in text will be as eq. (1), eqs. (2) and (3).

Tables

Be sparing in the use of tables and ensure that the data presented in tables do not duplicate results described elsewhere in the article (e.g. in graphs). Tables should be numbered consecutively in accordance with their appearance in the text and given a suitable caption. Tables should be simple with brief column headlines (including all units) and as few rows and columns as possible. Each table should be numbered consecutively and referred to in the text (e.g. Table 1). Supplied tables on separate pages at the end of the manuscript.

Figures

Figures can be supplied as, .jpeg or .pdf files. When supplying artwork files, please ensure that files are supplied at the correct resolution: Line artwork: minimum of 300 dpi; Halftones artwork: minimum of 600 dpi; Combinations artwork (line/halftone): minimum of 600 dpi.
